

Brand identity system

Logo • color • typography • digital assets • usage rules

Logo system

Use the supplied artwork for exact reproduction.

Primary mark

Stacked lockup

Horizontal lockup

Keep a clear zone of at least 25% of the symbol width around every logo variant.

Minimum normal UI size: 32 px for the mark. Use prepared icon exports for smaller contexts.

Color

A fresh green-to-azure gradient anchored by deep navy.

Navy
#112543

Emerald
#03C27E

Teal
#02C9C1

Azure
#01C8F6

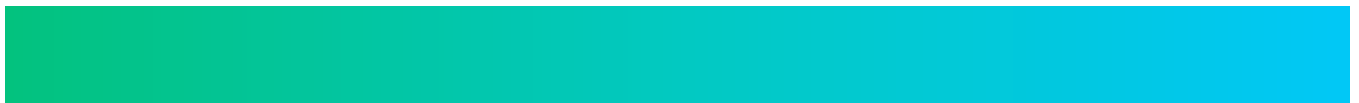

Mint
#65DFD5

Ice
#D2F2F1

Primary gradient

120° direction • Emerald 0% • Teal 52% • Azure 100%

Use navy for text and structural elements. Reserve the gradient for the feather, motion, and key accents.

Typography

Simple, technical and readable.

Product & documentation

Inter

Recommended: Regular / Medium / SemiBold / Bold

Fast local reasoning, visible decisions.

Fallback: system-ui, -apple-system, Segoe UI, sans-serif

Code & technical output

JetBrains Mono

```
decisio run --model qwen --score semantic-v2
```

WORDMARK NOTE

The supplied Decisio wordmark is artwork. Do not rebuild it from the typography stack when exact logo reproduction is required.

Usage

Preserve the mark's lightness and motion.

DO

- Use generous clear space
- Prefer white/off-white or navy
- Use supplied dark variants
- Keep the green → cyan direction
- Use prepared small icons

DON'T

- Stretch, skew or rotate
- Add shadows or outlines
- Recolor individual segments
- Move or detach the wheels
- Put the logo on busy imagery

Dark-background lockup uses white structural elements while preserving the feather gradient.

Digital assets

Ready for GitHub, docs, product surfaces and social previews.

App / social icon

README / website hero
